

Ekart Inu

Introduction

Ekart is all set to revolutionize and change the meaning of online shopping and cryptocurrency. Ekart presents to you Ekart Inu, tokens that foster a marketplace designed to give the customers the freedom to shop with crypto currencies. A genius, unique idea that will be fueled by the community and its trust. It is the first of its kind to be introduced globally.

Ekart Inu is a marketplace platform designed to allow anyone to shop from any online store. It will make good use of the most advanced technologies in the e-commerce field, including the option to pay for goods with crypto currencies and Ekart Inu tokens.

Our mission is to connect producers all over the globe and supply businesses with the necessary tools for launching one-of-a-kind merchandise to the global market with minimal transaction fees and without any financial borders, intermediaries, or annoying bureaucratic routine. We will bring producers together from all over the globe in order to create our own economical eco-system that will take e-commerce to a whole new level.

Ekart Inu will introduce official decentralized exchange (DEX) of our community. It gives holders the ability to swap independently among each other any Polygon (MATIC) token for another one. The safest and most trusted DEX in the world. Furthermore, it acts as the foundation upon which many of Ekart Inu's ongoing community development efforts will build additional features and functionality exclusive to Ekart Inu holders.

Disclaimer

Ekart Inu, including but not limited to the overall project, token, website, smart contracts, and any apps ("EKARTINU") as presented in this conceptual paper, is not a licensed, unlicensed, or exempted financial or payment service of any kind and in any jurisdiction. Any terminology used in this Whitepaper, on the Website, or within the app is intended only as a basic reference, without any active or legal meaning of the same terms in a regulated and financial environment. Ekart Inu is a decentralized and community-driven project and does not have owners, shareholders, promoters, marketers, managers, directors, or other figures or entities exerting any form of governance. Ekart Inu smart contracts are open-source, security audited, permanent, and non-modifiable in any way. The Ekart Inu token is strictly a utility token in all jurisdictions and cannot be considered a "security" or otherwise regulated token of any kind. Ekart Inu is not in any way e-money and/or fiat money or an asset-backed stablecoin, whether global or limited in scope. This Whitepaper taken by itself is not a contract or a contractual agreement of any kind, nor is it an invitation, solicitation, or to invest in Ekart Inu or acquire or use Ekart Inu tokens in any way and with any expectation of profit from there. Any user of Ekart Inu represents and warrants that such user has received appropriate technical, administrative, regulatory, and legal advice before and after accessing and reading this Whitepaper or the Website and using any portion or element of Ekart Inu (including the Ekart Inu token). The user, as a result of this, acknowledges and accepts that there is an inherently high risk in accessing, acquiring, or using any kind of blockchain and cryptosystem, token, platform, software or interface, including Ekart Inu, and further disavows any claim of any kind against any community member directly or indirectly involved with Ekart Inu, for any damage secured, including total loss. Ekart Inu makes a shopping website solely for the users' convenience. The Company is not a payment processor of any kind and has no control over credit card processing. Use at your own risk.

Tokenomics

Many crypto traders are looking for reliable exchange platforms to conduct cryptocurrency exchange at a beneficiary range. While other platforms will be charging a 10% fee, Ekart Inu has made fresh attempts to give back to the community as much as possible. Out of the total 10%, 5% will be their transaction fee, 2% goes return to the users, 2% is liquidity, and the remaining 1% will contribute to the covid-19 relief fund.

5%

Transaction fee

Public sale round

Ekart Inu will be offering 1 Quadrillion total supply. Out of this, 80% of the tokens burned. Burning a token means that the developers buy the tokens back in circulation and then store these tokens in a public wallet, commonly known as the 'Matic wallet.' This reduces the supply of the said token in circulation.

From the rest of the 20% supply, 2% will be given for airdrops and social media contests. Finally, 6% from the remaining will be accounted to invoice bonuses. The rest of the 12% is divided into 4 Phases.

1 Phase

The first phase will start with a sum of 0.0000001\$

Phase Supply : 3000000000000000

2 Phase

The Second phase will likely start at a sum of 0.000001\$

Phase Supply : 3000000000000000

3 Phase

The third phase will start off with 0.00001\$

Phase Supply : 3000000000000000

4 Phase

The fourth and the last phase will kick off with 0.0001\$

Phase Supply : 3000000000000000

EKART Vision

Ekart is a home name for decades now and is the most trusted brand name when it comes to logistics and supply chains. No one better understands the supply chain in the global market. A company fueled by the trust of the community is the first time stepping out of its comfort zones and creating a shop for the dreamers that you are. Our main motive is to give the account holders the power to decide the price of the tokens as at any point, a person will be eligible to hold not more than tokens worth \$10,000. Therefore, it is not the company but the people who determine the price of the tokens. Ekart Inu will not be just another crypto token; it will be a revolution in Global Market. A coin whose direct control is in the hands of the community and people. Cryptocurrency is the next generation, and this is the complete trend over the market; we are starting with an initiative to start using crypto currency over e-commerce portals. With the same initiative, we propose to start an e-commerce portal over the market and use Ekart Inu as the payment for online commerce.

Ekart Inu will never have boundaries; we want to create a platform where you can shop and invest at the same time.

Why not on Derivative exchanges?

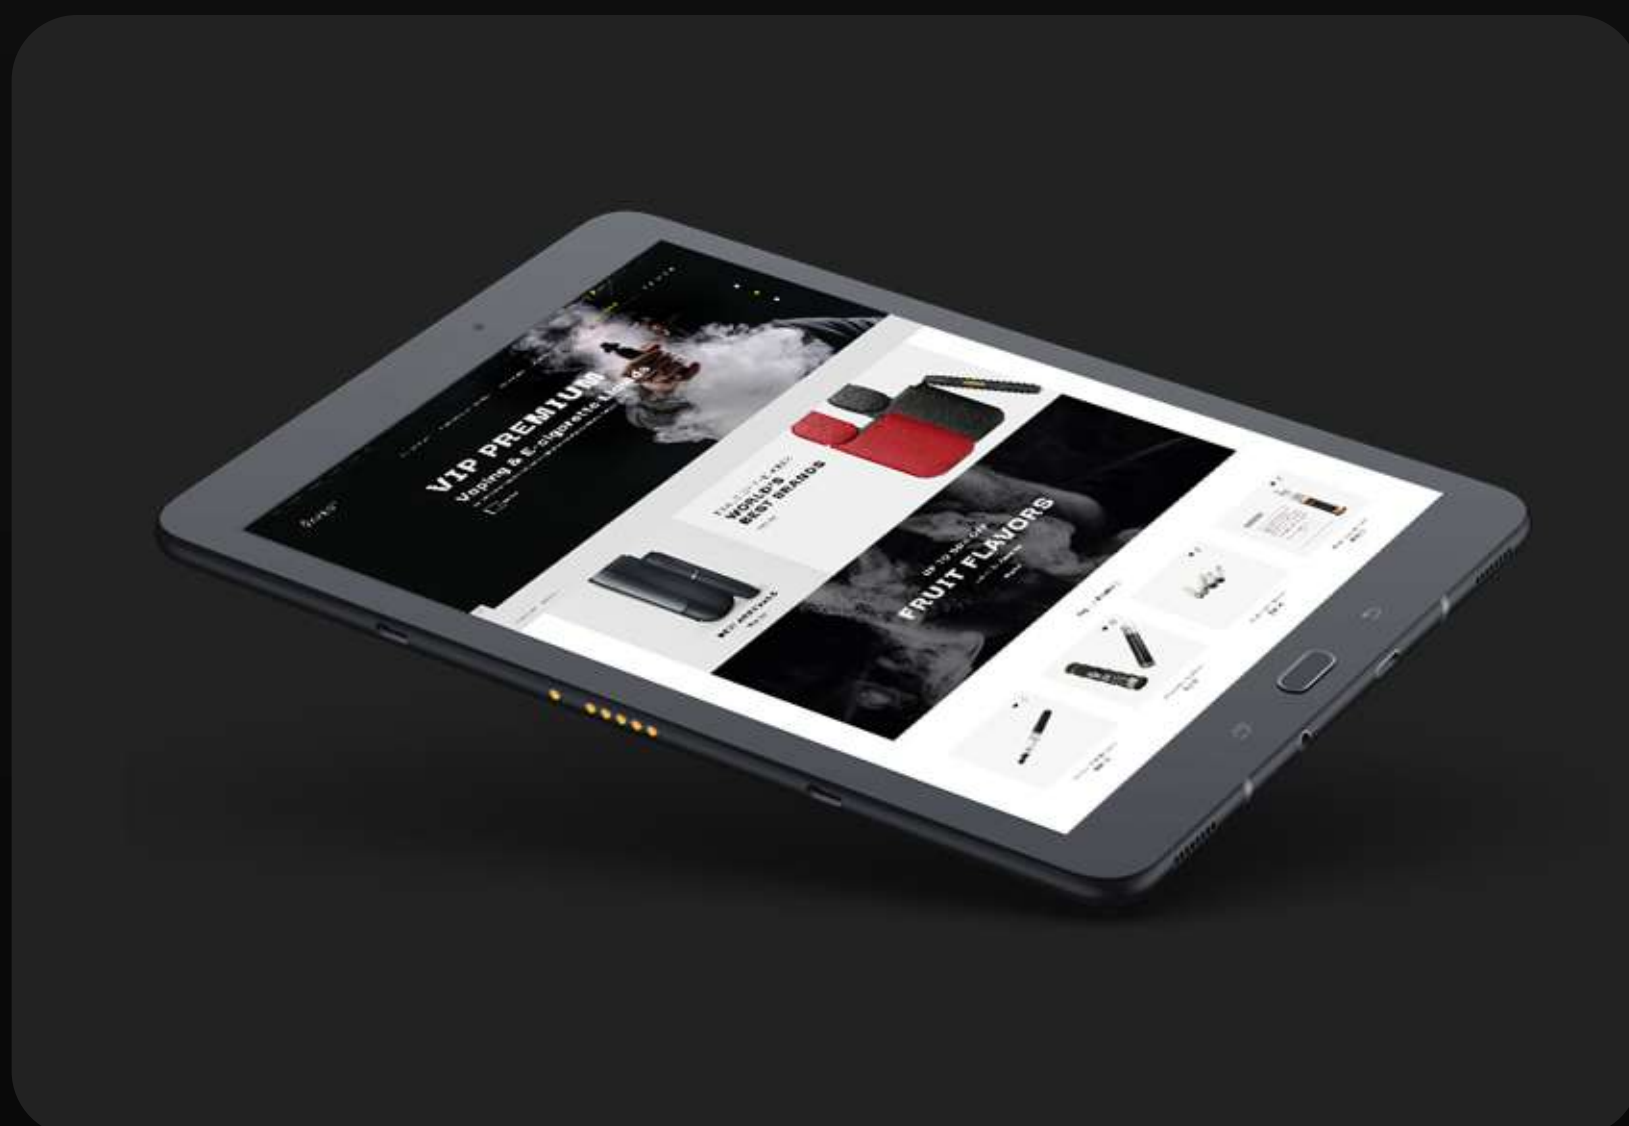

We do not support big investors as our model caps the sale through a strategic price hike. Our primary focus lies on curbing the ongoing model of volatile prices under exchange trade and do away with such investors who invest huge amounts and manipulate the price in the market. To do so, we follow the process of burning 80% tokens and manage the remaining 20% in a way to rule out the best price . We support our community by introducing the token in a number of e-commerce platforms and in all trade exchanges. This sums up our primary goal which we plan to achieve with our efforts. We will list on major Derivative (Uniswap...) and Spot (Binance, Huobi ...) exchanges once we close the pre-sale.

Future Products

Crypto Exchange:

A cryptocurrency exchange, or a digital currency exchange, is a business that allows customers to trade cryptocurrencies or digital currencies for other assets, such as conventional fiat money or other digital currencies.

Shopping Portal:

Ekart Inu is a marketplace platform designed to allow anyone to shop from any online store. It will make good use of the most advanced technologies in the e-commerce field, including the option to pay for goods with crypto currencies and Ekart Inu tokens.

Hard Wallet:

Our Ekart wallet is best for security because it comes with the strongest security features and track record of any reviewed hardware wallet.
